Personal profile

As an aspiring software developer, I want to pursue my passion and land a role where I can learn and build upon my skills. I am currently doing a software development course and have also been studying it through online courses and projects in my own time. I hope to bring these skills into the role of a software developer and have an impactful contribution from the start.

Skills

My strength is the ability to learn autonomously, as well as collectively, and gain the necessary skills needed for the specific task. I'm eager and enjoy learning about new technologies that I can apply to current and future projects.

I have experience building websites with the standard front-end technologies (HTML/CSS/JavaScript). I'm currently using these to build a construction website for a client. My core understanding has been built around python and have built several scripts designed to run on a raspberry Pi.

I have completed courses in SQL and relational databases and hope to dive more into the backend of web development.

WORK EXPERIENCE

I've worked with a local software development company (Switch Systems) to gain an insight into how they develop software for their clients. I was a part of meetings and paired programming. I also had a chance to work with Git in a collaborative project using agile methodologies.

I've volunteered for a homeless shelter charity. My role involved ensuring vulnerable adults had a hot meal for the night and any essentials they needed. My communication skills were crucial for working with the team and building a good rapport with the public. I regularly had to defuse situations and found that this role immensely helped improve my people skills.

I have been a self-employed delivery courier in Exeter. I always aim to provide a good service that all parties can be satisfied with. Due to my contributions to the local rider and public community I am one of the few *Deliveroo rider award winners 2021* chosen from across the UK.

EDUCATION

Exeter College – BTEC level 3 full diploma in IT – July 2019

Level 3 IT: Distinction / Merit / Merit

Holsworthy Secondary school – 10 GCSEs graded from A-C – July 2016

I achieved the following for the core subjects:

English Literature, English Language: B, B

Mathematics, statistics in Mathematics: B, B

Double science: A, A

Computer science: A

EXTRACURRICULAR ACTIVITIES

During my own time I regularly exercise and enjoy pushing myself to improve in my sports. This mainly includes running and Thai-boxing. I also enjoy working on different projects. This ranges from building electric bikes to websites and software projects. Most importantly, spending time with friends and family.
